

Connection to Commodore 1084S (version with cinch sockets)

Connection to TV with S-Video

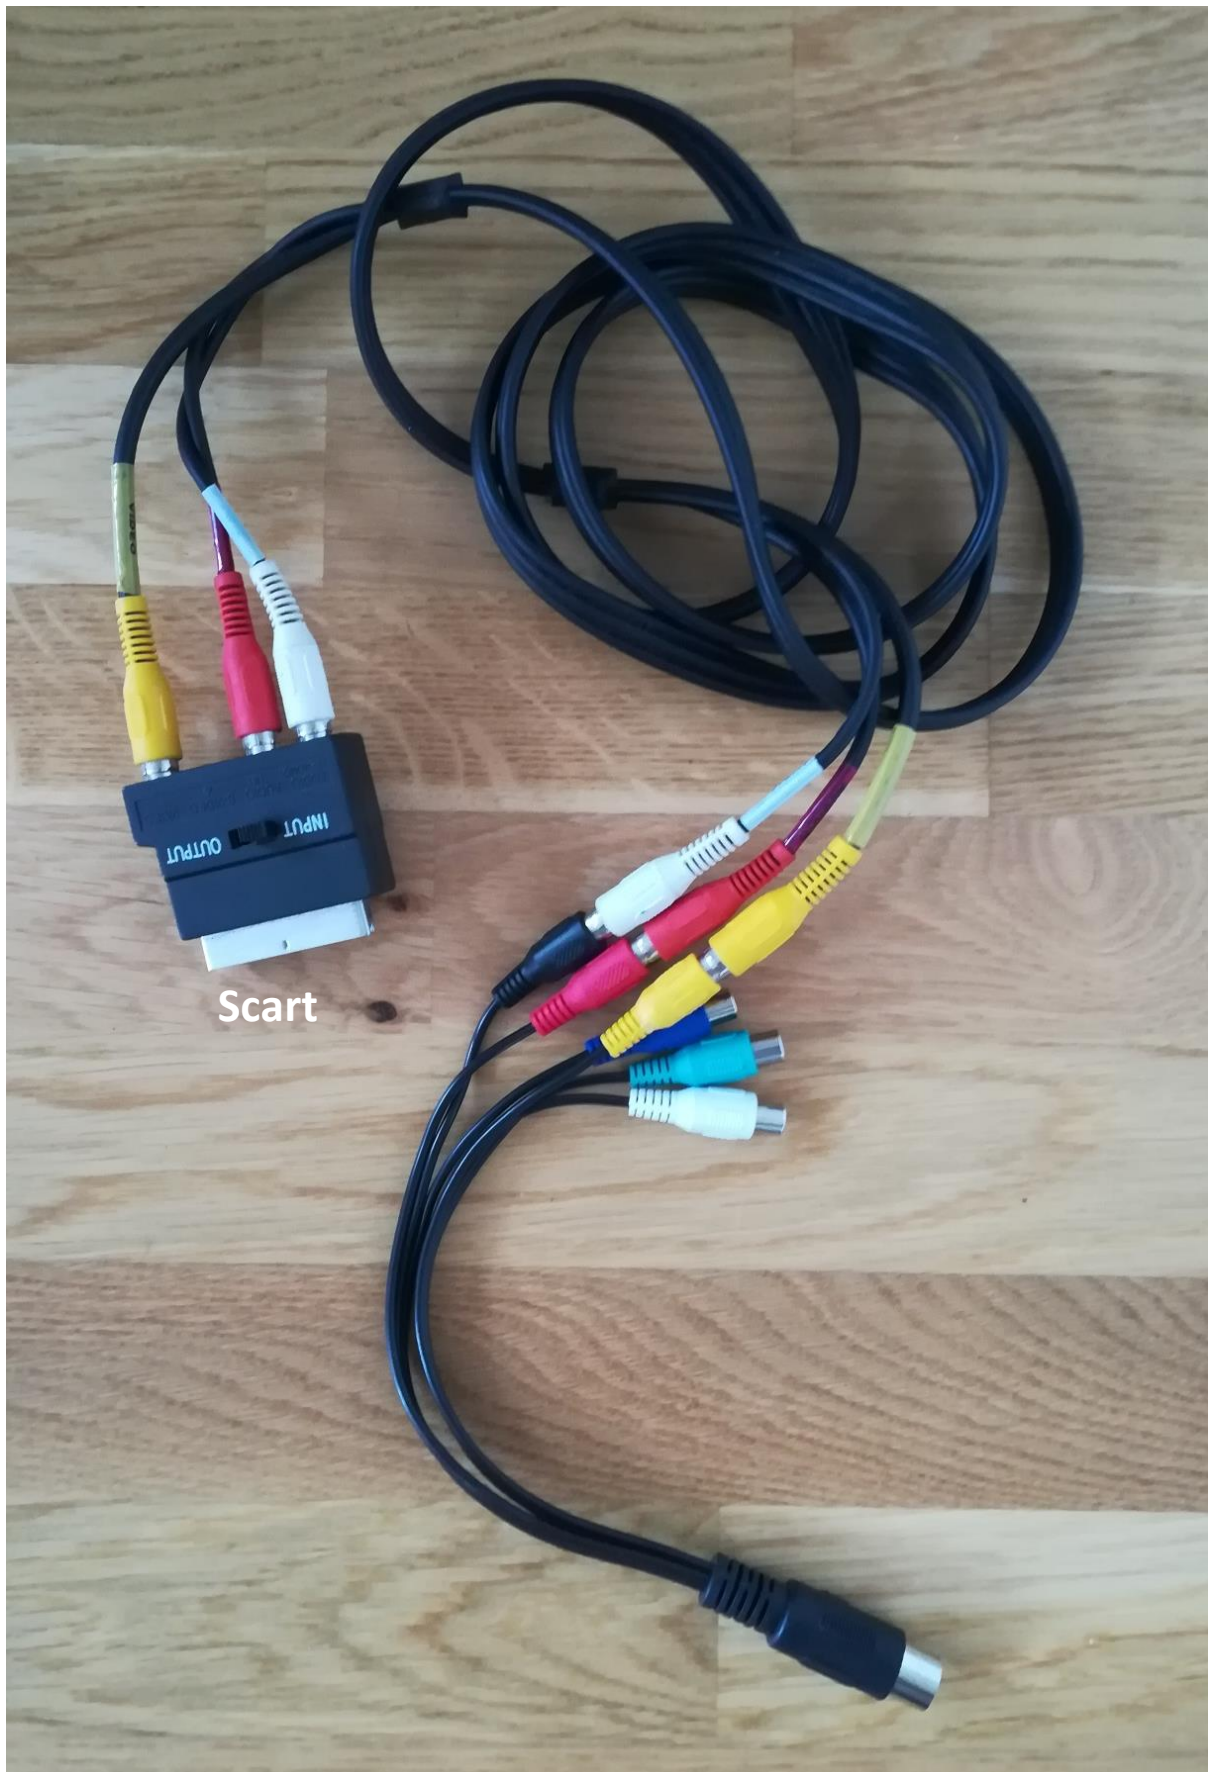

Note:

2xCinch to S-Video cables are hard to find. To purchase one check Australian web-sites. S-Video seems more popular „down under“.

I took a S-Video+2xCinch cable. Then cut away one S-Video plug. Now solder the green and white Cinch plugs to the cable.

Works like a charm!

Connection to TV with SCART Connector

Connection to CVBS Monitor and extra Audio Amplifier:
